DETAILED ACTION

Election/Restrictions

1. Applicant's election with traverse of Group II, readable on claims 14 through 24, in the reply filed on November 1, 2004 is acknowledged. The traversal is on the ground(s) that the restriction requirement was in error since claims 1 through 13 drawn to the invention that is Group I have already been cancelled upon filing of the instant divisional application. This is found persuasive and the restriction requirement made on October 1, 2004 is hereby withdrawn.

Specification

2. The abstract of the disclosure is objected to because it fails to concisely summarize the structure of the inventive device which is claimed in the instant apparatus, instead focusing on the corresponding method which was the subject of the parent application. Correction is required. See MPEP § 608.01(b).

Claim Rejections - 35 USC § 112

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

4. Claims 14 through 24 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The claims are generally narrative, indefinite, and written in a somewhat run-on fashion, thus failing to conform with current U.S. practice.

The limitation "on the buffer layer, *depositing a free layer* on which is a layer of non-magnetic material" [claim 14, lines 5-6] appears to be an attempt to recite process limitations in what otherwise appears to be an apparatus claim, thus rendering indefinite the metes and bounds of protection sought by claim 14 and claims 15 through 24 depending therefrom.

Art Unit: 3753

It is not clear to which element(s) the limitation "and having sloping sidewalls" as cited in line 14 of claim 14 refers.

Also with regard to base claim 14, the limitation "a second dielectric layer *over the entire device*" appearing in line 20 of the claim appears to be a double recitation of the device which is the subject of the claim and is first recited in the preamble of the claim.

Limitations including the terms "between about ____ and ____" appear in each of claims 16, and 18 through 23 and further render each of the ranges recited thereby indefinite because it is not clear whether the term "about" refers to each of the first-cited dimension and the second-cited dimension in the corresponding range, or whether it refers to the range as a whole, for example.

The above is an indicative, but not necessarily an exhaustive, list of 35 U.S.C. 112, second paragraph, problems. Applicant is therefore advised to carefully review all of the claims for additional problems. Correction is required of all of the 35 U.S.C. 112, second paragraph problems, whether or not these were particularly pointed out above.

Allowable Subject Matter

5. Claims 14 through 24 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action.

Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
